YAKUSHIMANUM HYBRIDS

On their home island of Yakushima (Japan), they grow on almost treeless mountain slopes at high altitude in full sun. Because of the powerful UV radiation the plant formed a felt-like hairy covering of the leaves (indumentum) as a sun and transpiration protection. Due to the extreme climate and site conditions prevailing there they develop enormous vitality and resilience. Hans Hachmann recognized the potential early on and spawned many new crossbreeds. For every intended usage we have rather upright-bushy growth forms or low, flat-growing ones such as from the group **"DIE KLEINEN WILDEN"** ("Little Wild Ones").

DIE KLEINEN WILDEN (left and below) SUN? BUT OF COURSE!

These extremely robust varieties have a flat, wide-oval habit, healthy foliage and an extremely rich set of buds! These dwarf Rhododendrons won't be attacked by insects at all!

'Debbie Dane'

'Schneekissen'

'Lucinda'

DECIDUOUS SHRUBS

Hamamelis 'Red Grace'

Hamamelis 'Golden Grace'®

Hamamelis 'Scarlet Grace'

Cornus kousa 'Cappuccino'

HACHMANN STANDS FOR QUALITY AND DIVERSITY

This is particularly reflected in the better deciduous trees.

Our breeds get worldwide attention especially in the sections

POTENTILLA
ILEX (HEDGE VARIETIES)
HAMAMELIS

We're always looking for the special and exclusive plant and we offer it in high quality!

Magnolia 'Daphne'

Magnolia 'Genie'

Cornus kousa 'Robert Select' (kl. Bild Frucht)

Styrax japonica 'Pendula'

Viburnum plicatum 'Pink Beauty'

AZALEAS Deciduous Azaleas & Japanese Azaleas

Rh. luteum 'Doloroso'

Rh. luteum 'Aprikot'

Rh. luteum 'Golden Nectarine'

Rh. atlanticum 'Snowbird'

DECIDUOUS AZALEAS (above and left)

drought tolerant
many varieties intensely fragrant
autumn foliage provides second decoration
easy to care for and tolerant of pruning
good for combining in colour groups

JAPANESE AZALEAS (right and below)

overwhelming abundance of flowers
neither evergreen
nor deciduous= wintergreen!
particularly pruning tolerant
